WORKS Command Center

The software for smart operator pools

FUNDAMENTALLY DIFFERENT WORKS Command Center

SMARTER OPERATORS WORK MORE EFFICIENT AND FLEXIBLE

Keeping lines running currently requires lots of personnel with long wait times, high costs and frequent mistakes.

Smart operator can now revolutionize these processes. They run their factories much faster and more efficiently. WORKS Command Center bundles requests from the factory floor, prioritizes them, and assigns them proactively and skill-based with sufficient lead time. The assist requests of the lines then appear as tasks on the mobile device of an available operator. The result is the efficient execution of assists across lines in flexible, smart operator pools.

SMART OPERATOR POOL

Use your production experts flexibly and where they are actually needed. WORKS Command Center is the first application that works with multi-line smart operator pools. That way, you use the smartest employees in your production more intelligently and efficiently, reducing your costs.

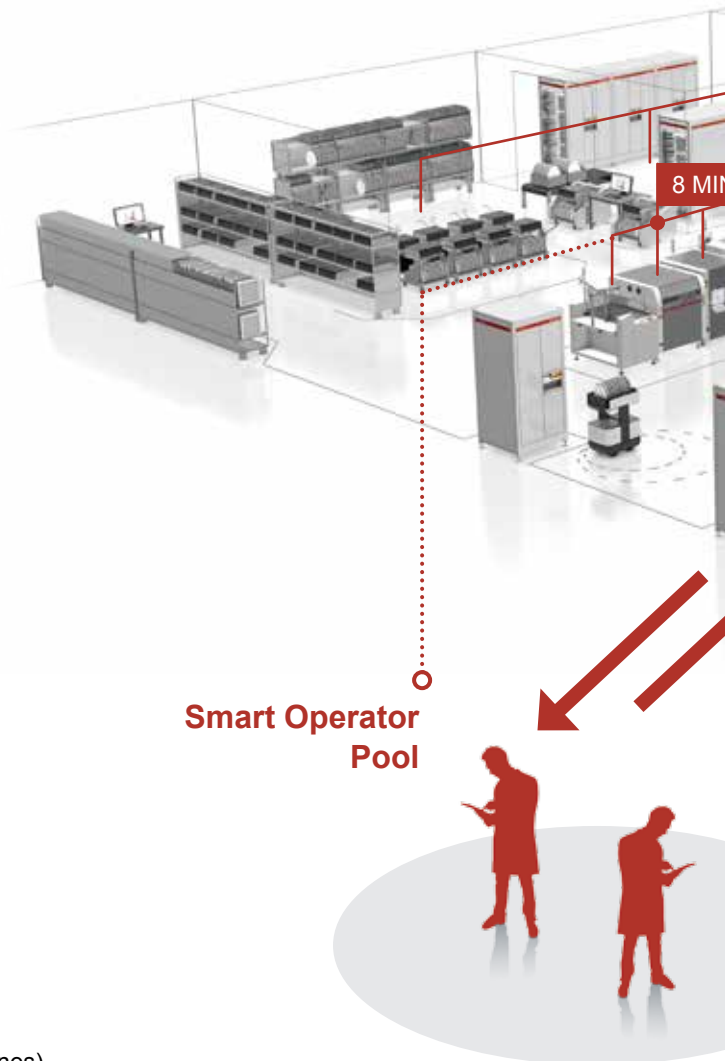

INTELLIGENT OPERATOR GUIDANCE

In connection with machines and planning systems, WORKS Command Center can proactively coordinate most assist requests while delivering the necessary information. This leads to a quieter work environment, more concentrated work on all lines, is more efficient, and minimizes errors.

Remote assists

No more running around. Many assists can be executed remotely from anywhere via WORKS Command Center.

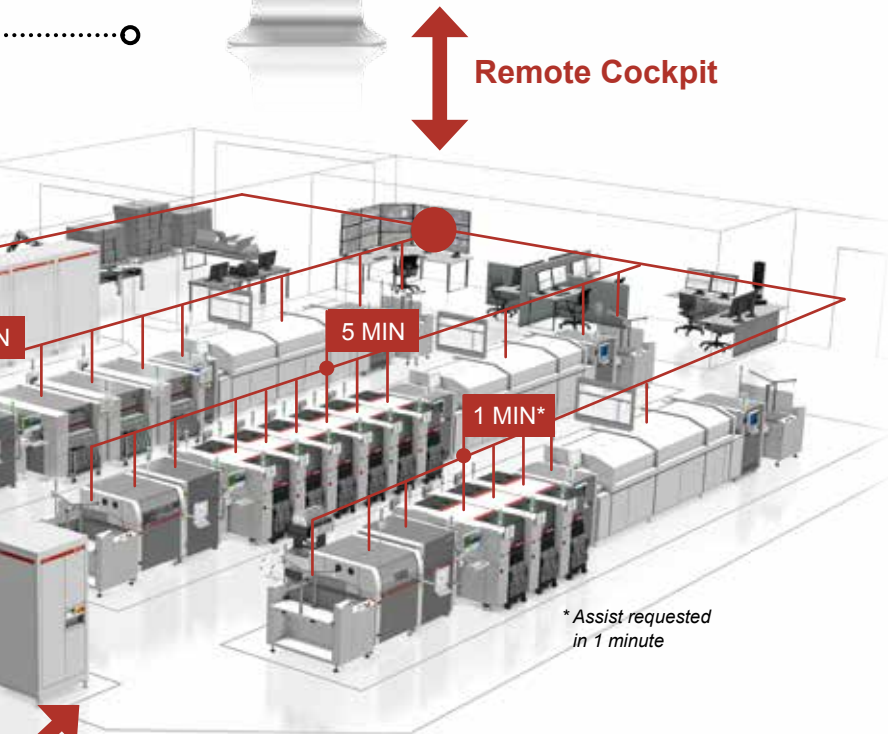

Integrated Smart Factory

All machines from all lines (including third-party machines), setup preparation areas, warehousing and production planning operations are integrated via IPC CFX.

SMART WORKING IN THE INTEGRATED SMART FACTORY

8 MIN

Manual assists

WORKS Command Center bundles and prioritizes requests from all lines and intelligently assigns them within the smart operator pool.

Scalable

Easily integrate new machines, lines, and operators.

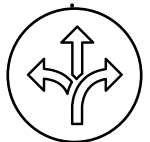

Mobile devices

The system coordinates your operators with individual task lists on mobile devices such as smartphones, tablets, smart watches, smart glasses, and the latest generation of handheld scanners.

Multi-line

No more rigid line assignments. The system deploys your operators wherever they are needed. They work more efficiently, and the frequency and duration of line stops gets minimized.

Qualification-based

To maximize the assignment efficiency, you can store operators' qualifications, training and responsibilities in WORKS Command Center.

Analytical tools

You can optimize your production with reports from WORKS Command Center by identifying particularly trouble-prone machines and analyzing your personnel costs, deployments and utilizations.
